

01/01/2021

The S2 Project- 2020 year-end assessment of the MAGA movement. With comments for the new year.

Though MAGA had many victories at the voting booth, and we would include the exposure of widespread voter fraud a victory, the actual work of MAGA (Gold column) is still lagging.

The Great Awakening, which should by some reports and back chatter communications if true, get a shot of adrenaline on Jan. 4th & 6th., 2021. Moving more people from Pink & Blue to the Red column. below.

We believe in 2021 the focus will still be on the federal level by the American populace. Leaving the hometowns, the home front, undefended from more socialist incursions in the schools and local government. State level government will get more attention than in 2020 due to continued lockdowns and mask mandates. But not enough citizen will partake of pushing back to make much of a difference.

The majority in 2021 will continue to wear masks and line up for Covid vaccinations. Adopt 5G networks as they have all tech with no change in that pattern. Continue to absorb network news out of habit along with the morning paper. This is and will be due to the lack of the majority seeing themselves in the Gold or Red columns. Not having a full understanding of their rights and power as American Citizens. That we have to acknowledge as a win for the Deep State long view of planning and application.

\*Column descriptions are incomplete due to available space.

\*\*The meme and the above assessment assembled by The S2 Project Regional Commanders, NY, LA, FL and edited and posted by the COIC.

Join the team and let's fix 2021 before it becomes another 2020.
