The United States of America is the 50 states UNITED. Each state is actually a country.

The Federal Government is a provisional corporation within the borders of Washington D.C.

The debt we borrowed for the fake *plandemic* and the 20 years of war in the desert that accomplished fuck all nothing. Was specifically designed to push us over the brink.

Now they are about to pass H.R 1 - the first resolution of the new corporation. The most unconstitutional tyranny anyone has ever seen. Because according to the Fed now, there is no Constitution.

This is the reason Biden had a dirty SUV when he first started. They had to redo the corporation, then bus in illegals so they could bond them out to get more fake money.

All the fraud in the world won't change anything. All the audits will long con train wreck just like AZ did, with both sides not following due process until it's too late sign a useless petition and buy a t-shirt. It's a con game. You and your land are the prize. Hence the massive push for a 50 state time waster by the same con artist. There is no reason to do it. Mike Lindell's Cyber Symposium is enough.

The one and only thing left we can do is The Convention of States and the successful prosecution of the fraudsters masquerading as international banks.

The debt is fake, so the bankruptcies are fake. No debt was ever borrowed, therefore nothing is owed, except to us.

Trump cannot be re-instated because the corporation he was president of is bankrupt and defunct. There is a now a new one in Washington D.C. Once again, a provisional government to manage the bankruptcy. They didn't tell

the people of 1871, or the people of 1913. What makes you think they will tell you this time either? It's actually in the Military Law says they don't have to tell the people, so they don't.

Which explains why our people are still captives. U.S. Code 18-242 Deprivation of Rights under color of law is being ignored. Because it is no longer Federal Law.

Marjorie Taylor Green and Matt Gatz showed us when they went there and they told they were trespassing. They may not even know the truth.

That jail they are being held in is in the jurisdiction of the Federal Government. The postage stamp of D.C and that is IT.

They will try again if they get stopped with HR-1 Ted Cruz redeemed himself Friday (August 13th, 2021) objecting to this at 3:30 or they would have stuffed it through at 3:33 am.

Our only chance is this now. The only way we can win. This is the conclusion I have reached. H.R. 1 finally clicked this morning. I don't think anything you think the government owes you, including my retirement is reasonable to think you would ever receive at this point. The lawsuit for 500 trillion is the only way we will ever see any of it.

The S2 Project Commander's note & comment;

While The Convention Of States (COS) (<https://conventionofstates.com/>) is an important movement. I disagree with “the only way” statement. True to fact and the masses do not realize it. It is 50 Wars for 50 States. Each state's Citizens have to fight for there own sovereignty with in those borders. The State assemblies are dirty and corrupt to different degrees per State. They are 'all in' on the land grabs with the federal corporation known commonly as the federal government. Someone has to plow Freedom Road ahead of COS in the states. In the counties of the states as well. That is The S2 Project. The nuts & bolts house cleaners. For COS to have maximum effect without outside Deep State interference or infiltration.

Many a day I have debated this with COS people, believers and some of the COS movement Leaders. I have never lost a debate or have I created an enemy. They are all good people. Believers in liberty. I'd sit next to them in in their church any day. Freedom Road needs to be plowed. We agree there.

I do believe in the Constitutional Sheriff ((CSPOA) <https://cspoa.org/about/>) movement as mentioned above and others- It's A long list - fighting for recognition & traction as THE S2 PROJECT (<https://thes2project.com/>) is doing. Tactical Civics (<https://members.tacticalcivics.com/>) also deserves a mention here.

Basically put, it's PLAN(s) - plural – when it comes to the grassroots effort in America, Canada, the UK, Australia and others in and out of the free world gone nuts.

I am not a one man brain trust nor am I one man opinion machine. By observation, investigation & conversation with grassroots people from all over do I get to my conclusions. Hats off to VolantCreation on GAB who ever you truly are. That was a solid piece of writing. To the rest of you... Get off the couch. There is work to do

From the Commander's desk.
