Saving Education From Socialism K-12

First step is to identify the threat. So how do you do that in your local community? Any parent gets notes sent home with their kid about class pictures, bake sales or a permission slip for a class trip. That is not what we are talking about here. So let me ask you. When was the last time you saw a memo that came down the chain from the State Board of Ed all the way down to your child's teacher? If the answer is never, where is the accountability?

The parents that have seen these memos and communications are now home schooling the children if they can. The FREEDOM OF INFORMATION ACT is the most powerful tool in the citizen arsenal. It increases in power and magnification when applied by more than one person. S2 is looking for that pattern along those chains. Where do these Teachers get the permission to teach socialism to our kids? Where do the marching orders come from?

A FREEDOM OF INFORMATION ACT (FOIA) request for all correspondence, instruction and memos to the teachers for the last school year would be a start. All correspondence, instruction and memos to the Principals from the local school board would be an alternate method. Doing both would be preferable. All correspondence, instructions and memos to the local school board from the state Board of Education. Meeting notes for the local school boards. The more information requested the more accountability you are demanding. Do you have to do this all by yourself? No. Get other parents to take on different parts of this and file multiple FOIA request. There is power in numbers.

You have every right to ask for this information. They have no legal right to ask you why you want the information. So you have the power. 'They work for us' is my only answer when asked.

Beware of resistance and redactions. For there you will find the most wrong doings. Also keep in mine that not all PTA's are filled with only good people. Democrat party members look for power in these organizations.

S2HQ is a collection point. We are looking for pattern in your state and the next. Once found the source will be publicly exposed.
