Article V Convention of States argument 10-15-2022

With the majority of the states that NEVER ratified the US Constitution- Or could produce the proof of ratification- The States have no STANDING in making changes. Add; There is no government, just mafia with NO infinitive in each state to clean their own houses of corruption. Or their own books of so called laws contrarian to Common Law or God's Law. AND. Each state's BAR (British Attorney Registry http://thematrixhasyou.org/13th-amendment/13th-amendment-secret-oath.html) Association will NOT confess to being so (British Attorney Registry) compromised. Then with high probability lead said convention?? Is a recipe for total ciaos in the aftermath.

You / I are living wo/man and should not be forced in a contract (Potential psy-op) not of your/my own making via popularity & narrative. Especially when the masses cannot say what the V VI VII or other amendments are about with confidence.

There is too much to be done FIRST. In a society that thinks wrongly there is one answer & correction only. It would be a farce to bring a national Convention forward where each state needs individual conventions to clean house. WHERE INTERNATIOAL INFUENCES loom large in dark corners. AND. A corporate media irrevocably adherent to truth & real journalism to report correctly the convention's intent, process, progress or outcome to the public. Under these conditions, honesty is not a possibility.

Article V Convention of States

**Still a bad idea.
Too much shit sitting in power.**

Leading to bleeding into consecutive generations more lies through a corrupted education system regardless of the convention's final product.

Man, must learn to walk barefoot in his own house before he can show the world that he knows how to tie his shoes. And so it is in each state of the Republic that The People know how to clean out the corruption locally. Unite locally. Before they unite nationally to correct the larger mess that is collectively America.
