

Whom can we still trust?

10-15-2022

Who in their right mind is ever again going to trust hospitals, doctors, nurses and health authorities, after the last three years of propaganda, lies, misinformation and murder of healthy people?

Who will ever again trust Police to protect citizens, after witnessing them beat, tasered, spray, shove, choke and trample people with horses (all with great enjoyment), ordinary people who, were doing nothing wrong, walking together down a street making their concern known about what is happening to us all? (I forgot to mention the sonic weapon they used on us in New Zealand and Australia) filthy bastards.

I have never trusted politicians and even less now. Not trusting them, has been replaced by absolute loathing for these blood sucking sub human reptiles.

Who will ever again trust the Education system, schools or teachers, they have been too willing to fall in line and be manipulated into manipulating and corrupting the most innocent and vulnerable in our world - our children?

I cannot watch a movie, go to a concert or watch tv, or go to a sports match, I cannot bear today's fashion shows as they have become freak shows working the beast system agenda, all I now see is demons, sub humans and moral corruption. Actresses, Actors, the music world and so called stars, are dead to me, my standards and morals are far too high to even give them the time of day.

I do not even trust the food I eat unless I have grown it.

I cannot ever imagine trusting the voting system or the Justice system again, they are morally bankrupt and satanic in their corruption.

I want peace, morals, decency and honesty to come back.

I am done with every single one of these things who rule and control our lives.

ps: NOBODY should be paying any gov organization to live on OUR planet= licenses, fees, taxes and fines need to be abolished.

Punishment should mean punishment and criminals have to be responsible for their own actions and take the punishment.
