OPINION: Do you want your hometown to be constitutional again?! The time is now *before* the 2024 nations elections.

I'm always so astonished that people can't or will not "*MacGyver*" their freedom back to 100% when how to do that is written all over the internet. Preferring to go by the current general knowledge which is often wrong and short on facts.

We can stand by doing nothing to be force fed tyranny or we can be free by our own hands & collective will. Starting with a petition to every household. If you think all this below happens automatically or is solely the work of government, *think again*. This is the Work of Patriots and can only get done by Patriots that care for their future here in America. End that part of the swamp where you live.

Below is the overview & cover page for local government Constitution & Financial Audits to make hometowns constitutional again. -Chris Oldham, Founder & Commander, The S2 Project
