If you're like most people, you probably dread receiving a bill in the mail, or at least find it mildly irritating.

It sounds too good to be true...

In this video, you'll learn why this is part of the United States Code, and has been statutory law since at least 1933.

And how you can properly take advantage of this remedy from financial hardship.

Transcript

what's going on my beautiful friend and welcome I'm David Greenberg and this is conditional acceptance.com and I've got a bit of good news for you because if you're like most people and I've I've certainly was this way most of my life you always experience a little bit of Stress and Anxiety every time you get a bill in the mail so every time you get a bill whether it's a utility bill or a credit card bill or a loan payment you know loan payment mortgage payment whatever it is tax tax liability property tax and on and on so I think you and I can agree that for most people this is something that's at least a little bit stressful and it's not something that say we look forward to but what if I were to tell you that every time you receive that bill it actually contains a check you might be thinking to yourself David what have you been smoking what are you talking about I know this sounds fantastic and believe me I thought the same thing the first time I heard this but when you receive a

What attendees are saying:

"David...this truly is awesome! I am deeply grateful to you for your investment of your knowledge, sweat and tears to generate this information....and your beautiful generous heart of sharing it with us."

"This is Soo good! Love learning the details."

"OMG... THIS IS GREAT STUFF!!!! BINGO! There it IS!!!!"

Are you ready to reclaim your sovereignty?

YOUR BILLS ARE PREPAID AND CONTAIN A CHECK

bill almost every time we can't say it's 100% of the time cuz sometimes it doesn't include it but let's just say 95 to 99% of the time when you receive these bills you're also receiving a check or you're receiving an instrument that you can turn into a check that would actually be a more accurate way of describing so first what I'm going to do is I'm going to show you two examples and then I'm going to come back here and kind of explain it and then what I'm going to do is I'm going to give you some uh suggestions to move forward so you can start to take advantage of these checks to in order to pay your bills okay so let's start with the examples okay so here's the first example I'm going to try to hold it up in a way that you guys can see it and of course I've redacted my personal confidential information so this happens to come from discover so it's a credit card check so how do we know it's a check or how do we know it could be used as a check or a money order if you look at the bottom you will see there are some routing numbers that don't quite match up to the account number so in some some of them they do but there's always these routing numbers and you're probably thinking to yourself what does that mean and also there's some barcodes and you'll notice that it looks like a check in the sense that it has an amount it has a from which is this case is you and it has usually has a to which could include the the name of the corporation or in this case it just has the address okay so there there are going to be some variations but basically if you look at it it has a lot of the elements of a check it's really just missing a pay to the order of statement and the amount written out in in words and then of course an

endorsement which would be a signature so really it's just missing a few things one more example and I printed this out so it's not it wasn't print by the actual credit card company and of course I've redacted all the confidential information so that uh if I upload this dat to YouTube they can't ding me for sharing confidential information but again you'll see that it has certain routing numbers and account numbers barcodes it has the from and to it has the pay amount uh and so on and so forth Am Mountain enclosed and they always say please return this portion with your payment or something like that so they're always telling you to send this in with your payment so why is that so let's uh let's step back I'm going to step out of the examples and we'll come back and let's talk this through so why are these companies sending you a check or a coupon that can be turned into a check why are they doing that well to understand this we need to go back to the e Emergency Banking Act of 1933 what's also been called hjr 192 which stands for house joint resolution 192 and I think it's also called it's also uh been codified as I'm not going to remember the name of the law I think it's public law 7310 but I'm not 100% sure about that but it it was eventually codified into the US code AS law as statute I should say not not law in the sense of common law because it's it's commercial law and everything everything they we're dealing with in the US code is essentially Commerce so the long and short of it is in 1933 the our ability to pay back debts with money was removed because according to the US Constitution money is only

YOUR BILLS ARE PREPAID AND CONTAIN A CHECK

gold and silver coin and in fact if you look in Black's Law Dictionary it says almost the same thing it says money is uh usually gold and silver coin it could also certificates that you have gold and silver or something of value on deposit but it specifically doesn't embrace notes or evidences of a debt now if we look at a dollar or any almost any fiat currency it's going to say something like note on it so if you look at uh what we call US Dollars it all says Federal Reserve notes okay so note stands for is short for promisory note and a promisory note is actually a type of new negotiable instrument okay so if we look at the Uniform Commercial Code UCC 3-14 it defines what a negotiable instrument is so basically in 1933 when our ability to pay back debts with money was taken away the uh those who instituted this knew that there needed to be a remedy like because this is going to create a huge imbalance because if you take away the ability to pay debts with money which is gold and silver coin then how how are people able to get out of debt okay so the answer is the short answer is you can now discharge your debts okay that was the remedy doesn't mean you need to pay your debts with another debt that's nonsense so when you go and send your hard-earned funds for example if you send funds from your bank account to pay a bill that's not paying a debt cuz that's like that's like putting out a fire with a fire it's like you're trying to put out the fire with more fire it doesn't make sense paying a debt with a debt it's not going to work but you can discharge the debts and this was this ability was given to you and to me and to everyone and it's been implemented through a trust that is established in

your name and that trust is is usually called the Social Security trust or the CEST trust or you could call it the Social Security CES trust it's a essentially a public corporation that is administered by the Social Security Administration in this country in the United States of America it's going to vary a little bit from country to country but it's it was a created for the purpose of discharging and paying all of your debts because it's a corporation it's therefore property it's not actually a living being uh it cannot accept liability so uh the the only the owners of that Corporation and you're not the owner have to accept the liability so that corporation's been given an account it's called a Social Security account it probably has several accounts but for all for Simplicity we'll just say it has one account Social Security account and that account has been funded has credits which is essentially the equivalent of Federal Reserve notes or US dollars in the modern implementation and that account can be used to pay all of your public debts okay so the account the Social Security account set up for you can be used to pay all of your debts okay so when you go back um and I cover this in my free live workshops that I handle that I conduct every Saturday on Zoom so I'm going to provide a link somewhere if you want to go sign up it's completely free it's a live workshop on zoom and I kind of walk through what you would need to do specifically in order to endorse these checks and uh endorse these coupons and turn them into a check so that the funds can be paid out of your account actually they are paid out of your account already it's just your trans you're you're giving permission to transfer the

YOUR BILLS ARE PREPAID AND CONTAIN A CHECK

balance for offset to to set the account back to zero but uh if you look at the number let's just look one more time if you look at any of the numbers on any of these bills and this will be true again 99.99% of the time it's always a positive number right it's always a positive number that indicates that there is a positive balance in that account so positive balance means the account has been credited so essentially when you get the bill it's already been credited from the funds or the or the credits in the trust of which you are the beneficiary and actually one more thing I forgot to point out sorry about the back and forth here you'll notice that your name is essentially all 99% of the time it's going to be your name in all caps it could be with or without your middle initial it could have your middle name spelled out on the other one it looks exactly like it does on my tax statements or on my social security card it's my first name middle initial last name so that's closer to the way it looks on the trust so it could be a variation but it's always in capital letters to indicate that it's the name of a corporation and that makes sense because the the check has a from and a two in this case the from is from you because you are already paying it so the funds are already in the account and what you're doing is you're making it payable to the bearer or the receiver so the Bearer in this case would be the name of you know the bank or corporation that is receiving the payment so they are essentially going to receive that and that act of receiving it and transferring it to a different account is going to debit this account and then it's going to bring the balance back to zero okay so that essentially how you pay it and if you look up payment in

Black's Law Dictionary fourth edition the reason we use fourth edition sometimes people ask me this like why don't you use like the ninth the 11th edition whatever the most recent is the problem is that like a lot of things they meaning the bank you principally the bankers uh and those you know in higher you know those who have influence have modified certain definitions to to to suit their needs to basically fit the agenda fourth edition is sufficiently untouched meaning it's it's a version that is fairly pristine and you can rely on those definitions and the thing about definitions is they don't expire so if you use a definition from the four Black's Law fourth edition you can it's still going to apply today so if you look up the definition of if you look at the definition of a payment payment is the performance of an agreement or the Fulfillment of a promise or obligation and that's essentially what you're doing when you make a payment at here you're just performing based on the agreement because the agreement is the funds were paid out of the trust and basically to perform all you need to do is do a proper endorsement uh add some codes add some information to that check or to make it into a check or a money order so you're just you're doing Endor and then adding special instructions and sending a nice letter along with it to explain to the uh you know the the officer in the corporation how to process that payment so that's all you have to do you don't have to send in a check of your own from your own bank account um you don't certainly don't want to make online electri electronic payments um it doesn't need to come out of your own funds because all of your debts are paid for from the trust okay

YOUR BILLS ARE PREPAID AND CONTAIN A CHECK

and this is something I'm going to say over and over and over again this is this is per the commercial law this is how it's been set up and this is the remedy to the fact that they've removed the ability to pay debts with gold and silver which is the actual only true money that that is recognized by the US Constitution in this country and in general money has to be something of value something tangible it can't just be pieces of paper evidences of a debt okay so we now uh we now live in a world where you can essentially just discharge all of your debts simply by using the power of your signature I mean that's as incredible as that sounds that that's way it is because you are part of what you and I and all of us are what's backing the debt owed by the United States Corporation the United States is a corporation to the bankers to the in this case to the private Federal Reserve banking system so we're essentially the collateral so there had to be a way for us to obtain a remedy from losing our ability to actually pay debts with gold and silver so this is how it works I'm not going to get into this in this video exactly how to endorse the coupon how to do that because I cover that in the free Workshop so if you are someone that's been stressed out about how to pay your bills and you want to learn this process your number one step your number one next step is come and come to one of my workshops on Saturdays and like I said I'm going to provide a link you can so join our private telegram group there's no uh anyone can join it's open to the public I also do have a membership and with the membership there's a couple of benefits you get uh access to all the recordings you also get invited to weekly or bi-weekly private study sessions where we can Workshop all of this together in a small group you also

get access to all of my templates so all my conditional acceptance letter templates remittance letter examples of the coupon and all the time I'm adding more and more goodies into that folder so uh you're definitely going to want to um check that out I've got some really powerful stuff coming up I've got some great really powerful cases for conditional acceptance I don't want to say too much yet I also share in that folder all the documents to basically file a claim of lean and collect with the help of the US Treasury as your as the agent as the collection agency to help you collect on the leans in order to enforce your conditional acceptance letters so if you are someone that's been struggling with uh not only just getting out of debt but I would say any kind of presentment for example if if you've been sued or wrongful arrest or someone's trying to collect child support or alimony or any kind of fine or fee or if you have you're overwhelmed by your taxes anything at all if you've been charged with a victimless crime for example possessing a particular substance no harmed party these are all great examples of where you can get a remedy through conditional acceptance so I want to invite you to get involved in this community this is a life skill so you're going to need to show up and be ready to start learning but not expect like to just push a button and all of a sudden all your problems are going to go away that's not how this works okay I sometimes get people showing up at the 11th hour and they think that somehow how you know there's some savior that's going to fix everything for them instantly it doesn't work like that folks I've been studying this stuff for more than a year now and I'm just

YOUR BILLS ARE PREPAID AND CONTAIN A CHECK

starting to crack the surface I'm very fortunate because I have mentors who have helped me to learn along the way that I've been willing to put time and I Mo the most the biggest investment I've made is just being willing to put hours and hours of my time into studying this not even investing a lot of my funds but just like hours of study of reading of watching video uh and of course practicing and and putting it to the practice I want to invite you to come in and learn this life skill because it's going to serve you through through your entire lifetime so this goes Way Beyond just being able to dissolve your debts and eliminate your debts and have your debts discharge although that's a big part of it because I know that if you're like most people you you know you're you're doing whatever you're doing everything you can just to stay Al float so I hope you found this helpful if you have I want to invite you to smash through that like button on this video put a comment below anything that you've gotten out of it share this video with people you know and of course either subscribe or follow depending on where you're watching this because I do upload to a couple different platforms so either subscribe or follow and I'll look forward to seeing you very soon take care
