

It's hard to tell some one that they have been bamboozled. It's harder still to tell them that they have bamboozled themselves. Look at this math problem as a fraction, being $1/34,300$. The 1, represents Washington, DC. The 34,300 represents the number of hometown in the USA. But we're not done. Let's talk about the American focus. Most of it on Washington, DC. The 1. And for the focus let's use the number of President Trump's 73,600,000 followers on twitter to represent that 1. And that would look like this as a fraction.

$$\frac{73,600,000}{34,300}$$

So I ask this question. Who is watching the home front, the hometowns, in this upside-down fraction representing the focus of Americans? Even if the active Trump followers is one tenth of the number above. We're still upside-down in focus. Compliments, no doubt of our main stream media outlet programming. Including the Boomer generation.

Now if. And it is a really big if because of the mental programming to date. We could flip that fraction over. Then it's DC be damned. Because we would be in control of the rest of the country. True Citizen Bosses. Averaging 2,145 citizens being the watchdogs in each place. Cities more and small towns less. Then each of these people get one person to help out. We could get twice as much done. Rooting out the corruption in each place. Then the big push by all in each hometown in each state to push our legislatures to a more pro-American stance. This is The S2 Project. Ignorance is not a strength. It is actually part of the programming. We provide the education, support and a communications platform at the national headquarters know at Patriot Headquarters on our web site. If you have ever seen the movie Kingsman, you'll know that the real work is done behind the Taylor shop. We have set our web site much the same way. Register today to enter and start your own local team with friends & family. Liberty must win and can only happen with Americans standing up for their communities.
