

Commander's Notebook for 5/10/2020, The S2 Project

THE FIGHT IS LOCAL

Always was.

With most Americans focused on Washington DC., where the Democrat party want all the public's focus via their partners in the main stream media, they can steal your lunch money. Your Rights. Your children via crooked courts and the CPS.

To the American public; YOU'VE BEEN HAD! Hook, line, sinker and mental programming. You ate it all.

We have solutions that are home town bases. And it all starts with you where you live. If you think protesting and caring a sign. That's not us. Breaking the financial backs of the wicked, exposing corruption, forcing resignations, politicians escorted away from their post in handcuffs..... Yes there's more. That's us!

We are The S2 Project. (<https://thes2project.com>) We love all the working stiff Patriots that work with us in their spare time. Trading some of their TV viewing time each week so they can enjoy a better community. Have a proper public education system that educates not indoctrinates. Corraling voter fraud so one voice one vote matters and works again.

A lot of organizations go screaming the what, where, who and might have a handle on why. Then plead for donations to spend on ???????? they say not where the money goes. At The S2 Project we are all about the how, getting results, and teaching the how to. So please come and take a look. All skill levels are welcome here.
