

As a American Patriot there are many task and opportunities that can both help with to MAGA & give the political a hard time to ruin their day. You may think that their tons of people already doing these things. But the reality is **no**, we on the political right have a almost total man power shortage of volunteers. Why? Let Pres. Trump do it. Or that is what people think. That the man in the White House has unlimited resources. That he has people working the grass roots angle outside of his campaign to think up these ideas that the common man & woman can do. He is not. And can not. It is up to us, the Patriots.

List of tasks. Here is two;

- Antifa &BLM is using craigslist.org to hire the hourly paid protesters. Tracking down these ads and reporting / flagging them on that site is one way. By telling a few friends to do the same we can get the ads removed. As complicity leftist as craigslist is they do not like the attention. If phone numbers are given, those numbers deed to be tracked down.
- Have you ever heard the term “phone bomb”? It's an activity where many multiple people call the same phone number and leave bogus messages to fill up the message in-box and tie up the phone line. This can be done not just to Antifa &BLM ads, but their donation sources.

Push back dose not mean always taking the high road. This is war. Using the enemy's tactics to fight fire with fire is the best method. For how you can help write us at; <https://thes2project.com/contact>
We would also like to hear new ideas.
